## Intro to Python

WILLIAM & MARY - NOVEMBER 2016

## Outline for today

- •What is Python?
- •Hello world!
- Scraping Twitter with Python
- Parsing JSON in Python

## What is Python?

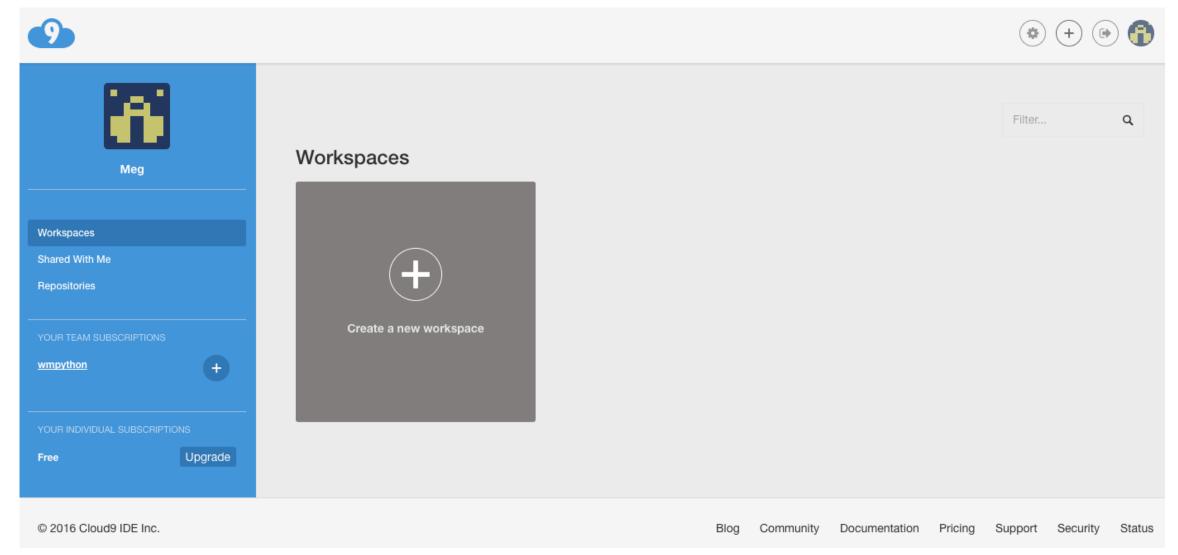

"Python is an interpreted, object-oriented, high-level programming language with dynamic semantics."

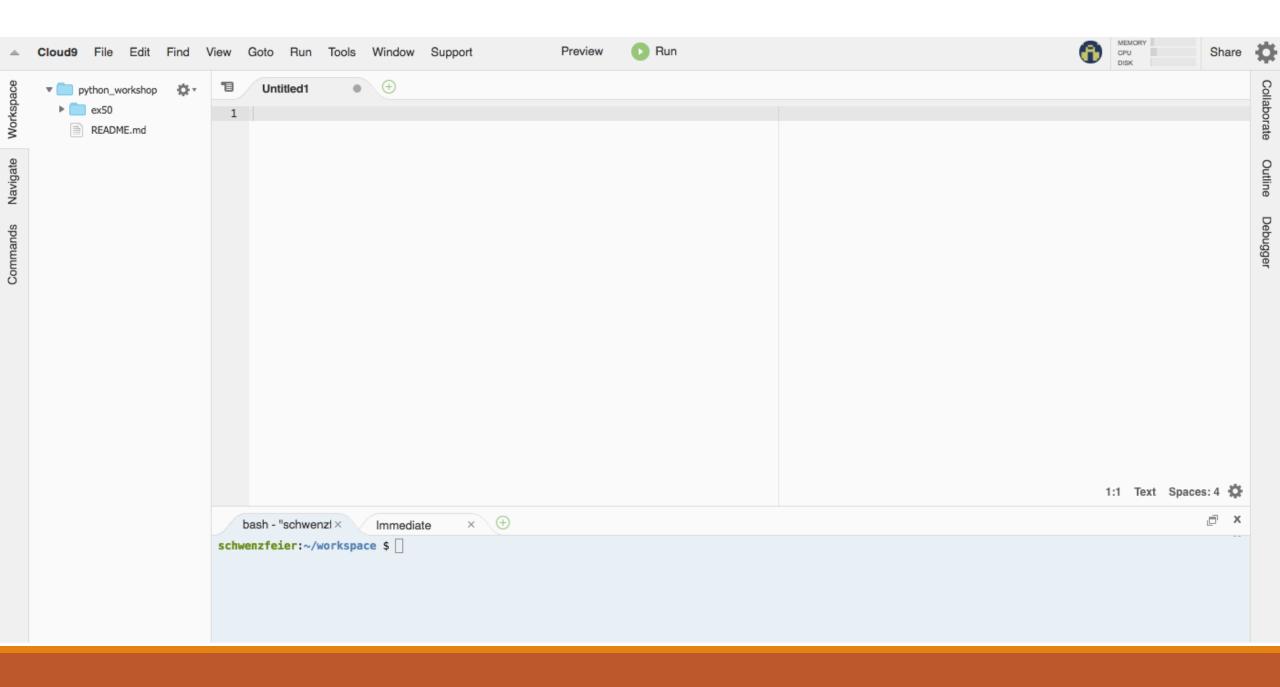

- Object-oriented
- Emphasizes readability

#### Used all over the place

- Data analysis Web scraping, machine learning
- Websites Django and Flask

## Cloud9 – Cloud Python environment

## The world's shortest command line tutorial

pwd – tells you where you currently are ("Print working directory")

Same as getwd() in R

#### **cd** – changes the directory

- Ex: cd ../ changes the directory one folder up
- Ex: cd /home/users/meg/python\_workshop changes to python workshop folder

#### **Is** – lists files in the directory

- Is lists files in current working directory
- Is python\_workshop lists files in the python\_workshop directory that is in my current directory

#### touch - creates a file

Ex: touch helloworld.py – creates a file in the current working directory called helloworld.py

```
bash - "schwenz ×
```

#### Immediate

```
schwenzfeier:~/workspace $ pwd
/home/ubuntu/workspace
schwenzfeier:~/workspace $ ls
README.md ex50/
schwenzfeier:~/workspace $ touch helloworld.py
schwenzfeier:~/workspace $ ls
README.md ex50/ helloworld.py
schwenzfeier:~/workspace $ []
```

Create a file called "helloworld.py"

## Hello world!

## Printing

#### Try to print

- Your name
- William and Mary's president is Taylor Reveley
- President Reveley says "succulent" frequently

## Data types

What type are each of these?

- ° 5
- ° "5"
- 5.0
- "5.0"
- [5, "5", 5.0]
- Hint you can use type() to help

What do the following give you?

- · 5.0 \* 5
- "5.0" \* 5
- [5, "5", 5.0] \* 5

## Nonsense Program – Sandwich Maker

- Write a program that tells you whether you have the ingredients to make a PB&J
  - Take inputs:
    - # of slices of bread
    - # of servings of peanut butter
    - # of servings of jelly you have
- Evaluate the input ingredients and print a message can you make a sandwich or not?

Bonus: What would you need to do to the program to make it say <u>how many</u> sandwiches you could make with the input ingredients?

## Scraping Twitter with Python

# Go to: apps.twitter.com

### **Twitter Apps**

Create New App

#### **Application Settings**

Keep the "Consumer Secret" a secret. This key should never be human-readable in your application.

Consumer Key (API Key)

Consumer Secret (API Secret)

Access Level Read and write (modify app permissions)

Owner \_Schwenzfeier

Owner ID 225468091

#### **Application Actions**

Regenerate Consumer Key and Secret

Change App Permissions

#### Your Access Token

You haven't authorized this application for your own account yet.

By creating your access token here, you will have everything you need to make API calls right away. The ac application's current permission level.

#### **Token Actions**

Create my access token
